

ProTrans International® Joins SmartWay Transport Partnership

INDIANAPOLIS, INDIANA, JANUARY, 2011: ProTrans International, Inc., has joined the SmartWay Transport Partnership, an innovative collaboration between U.S. Environmental Protection Agency (EPA) and industry designed to significantly reduce greenhouse gases and air pollution.

By being a partner of SmartWay, ProTrans has demonstrated a commitment to promoting greater energy efficiency and air quality within the freight transport sector. As a partner, PTI encourages their carriers to participate in the SmartWay Transport Partnership, and that support includes helping carriers get the information and tools they need to reduce fuel consumption, save money and make a positive impact on the environment.

“This is great news,” said Shawn Masters, ProTrans Vice President of Operations. “This is a program I knew made sense for us and I am very pleased we were persistent and got it done.”

Launched in February 2004, the SmartWay Transport Partnership brings together major freight shippers, trucking companies, railroads, logistics companies and trade/professional associations to pursue mutually beneficial strategies that result in emissions reductions and other environmental improvements, as well as cost savings to the companies. More information on the SmartWay program may be found at: <http://www.epa.gov/smartwaylogistics/>

About ProTrans International, Inc.
