

For Immediate Release

ProTrans Selected a 2015 Top 100 Third-Party Logistics (3PL) Provider

Indianapolis, IN (August 24, 2015) ProTrans announces recognition as a 2015 Top 100 3PL Logistics Provider from Inbound Logistics (IL). The Top 100 list appears in the July 2015 issue and is posted online in a digital edition.

Top 100 Selection Methodology

Each year, Inbound Logistics editors select the best logistics solutions providers by carefully evaluating submitted information, conducting personal interviews, online research, and comparing that data to their readers' burgeoning global supply chain and logistics challenges. The service providers IL selected are companies that, in the opinion of IL editors, offer the diverse operational capabilities and experience to meet readers' unique supply chain and logistics needs.

“When choosing the 2015 Top 100 3PL Providers, Inbound Logistics editors looked for providers demonstrating excellence in optimizing transportation and logistics operations, as well as transformative solutions that drive integration across internal and external business processes. ProTrans was selected because its solutions solve specific logistics challenges, improve processes, and create a ripple effect of efficiencies across the entire value chain. Inbound Logistics is proud to honor ProTrans for innovative solutions empowering logistics and supply chain excellence in 2015.” – Felecia Stratton, Editor, Inbound Logistics

“Being considered a Top 100 logistics company is a true honor. This award demonstrates the commitment ProTrans continues to exhibit in delivering solutions that make a difference for our customers. We are proud to again receive this award by IL.” – Shawn Masters, Chief Commercial Officer, ProTrans

About Inbound Logistics

Inbound Logistics is the leading trade magazine targeted toward business logistics and supply chain managers. The magazine's editorial mission is to help companies of all sizes better manage corporate resources by speeding and reducing inventory, supporting infrastructure and better matching demand signals to supply lines.
